The BiogasAction project is supported by the EU Horizon 2020 Programme to serve as a vehicle for boosting the development of the European biogas/biomethane sector. It aims at promoting biogas development in the target countries/regions Rhonaip and Western part of France, Wales/UK, Croatia, Czech Republic, Netherlands, Denmark, Latvia and South East Sweden enabled by proven support strategies and guidelines. This will be supplemented with replication and dissemination at broad European scale for sharing of experiences and replicate good practice in further countries and regions.

**WP2: Tools for successful biogas initiatives and deployment**

According to the experience of project partners and results of completed bioenergy projects, the most effective trigger for stimulating the deployment of biogas/biomethane technology is a regional approach. Consequently, WP2 focuses on existing documentation of EU and national projects and success stories that help strengthening the regional initiatives.
